Summary

Full Stack Software Engineer with 3+ years of experience building scalable, user-centric web applications and APIs, leading to a startup's successful acquisition. Proficient in React, NextJS, NodeJS, TypeScript, Python, and Cloud Solutions like Google Cloud Platform and Amazon Web Services. Passionate about collaborating with cross-functional teams to solve complex problems and deliver high-performance solutions.

Technical Skills

- **Languages:** JavaScript (ES6+), TypeScript, Node.js, Python, HTML, CSS, Sass SCSS, SQL
 - **Frameworks/Libraries:** React, Redux, Next.js, Express.js, Django, Flask, Tailwind CSS, Bootstrap, Material UI, Cypress, Jest
 - **Databases:** PostgreSQL (Postgres), Supabase, MySQL, MongoDB, Firebase, Firestore
 - **Tools/Platforms:** GCP, AWS, Vercel, Git, GitHub, Docker, Kubernetes, Figma, WebSocket, LLM (OpenAI)
 - **Methodologies:** Agile, Scrum, Test-Driven Development (TDD)
 - **Soft Skills:** Communication, Collaboration, Problem-solving, Time Management, Leadership, Attention to Detail
-

Work Experience

Lead Full Stack Engineer

Sep 2021 — Feb 2024

Dart Health (Puzzl Inc), San Francisco, CA — Startup: CRM → Fintech → Healthcare Compliance

- Tailored a healthcare compliance chatbot with OpenAI Assistants API, reducing user questions to the cofounders by 40% and easing their workload. (Node.js, Express.js, TypeScript).
- Implemented automated unit testing and end-to-end testing with Jest (backend) and Cypress (frontend), significantly reducing bugs and saving 15-20 hours per week in testing cycles.
- Integrated Stripe Connect, boosting transaction efficiency and driving increased revenue. (B2B and B2C SaaS).
- Developed a responsive project portal and messaging system, streamlining workflow management for businesses. Imagine a combination of Linear and Slack. (React, TypeScript, Tailwind CSS).

Software Developer Intern

Jan 2021 — Sep 2021

MarketFly (Acquired), San Francisco, CA — SaaS Startup

- Played a key role in the startup's successful acquisition by designing a marketing automation feature for users to authenticate across Facebook, Instagram, and Twitter to schedule posts, scaling platform capabilities.
 - Constructed a REST API and integrated Bannerbear API for social media visuals generation, significantly increasing user engagement on the platform. (Node.js, Express.js, TypeScript).
 - Collaborated with UI/UX designers to convert Figma wireframes into React code, cutting design and development time by 20%.
 - Formulated complex database schemas, optimizing query performance and ensuring scalability. (MongoDB).
-

Education

Bachelor of Science in Computer Science

Graduated: May 2022

San Francisco State University

Relevant coursework: Software Engineering, Artificial Intelligence, Analysis of Algorithms, Databases, Internet Application Design and Development, Object-oriented Programming (OOP), Data Structures and Algorithms, Design Patterns.

Projects

ChoiceHub

2024

A platform where friends can vote on various types of nearby places, from dining options to other locations of interest. Users select categories, cast their votes, and view real-time results, making group decisions easy and enjoyable. Utilized Next.js, Tailwind CSS, Vercel, Google Maps Platform, Supabase, GitHub Actions.

Streamify

2024

Full stack application for connecting your Spotify account and displaying data and analytics on the dashboard. Utilized React, TypeScript, Material UI, Node/Express.js, Spotify API, Google Cloud Platform (Cloud Run, Firestore), Docker.
